<b>Brief Introduction of the Organization</b>					
<p>Breakthrough intelligent battery charging technology from EBULL™ POWER INNOVATIONS enables fastcharging of batteries without the conventional tradeoff of reduced battery lifetime. The technology breaks conventional Mass Charging Theory and it is based on sophisticated algorithms that combine knowledge of the chemistry with electronics to extract the most efficient operation from the battery. The result is fully charge batteries in a very short time which is merely 10-20% of traditional charging time required by CCCV charging method. EBULL™ POWER INNOVATIONS is now targeting Life-On Mobility, electric utility vehicle, logistic equipments and public consumer area. The team is strong in R&amp;D in both software and switching power hardware design, protected by over 20 patents including PCT patent.</p> <p>EBULL™ POWER INNOVATIONS is in the leading position in Industrial Lithium Fast Charging area and supplying to major industry leader home and abroad. Ebull has also finalized two rounds VC capital financing in just one year and it is now growing rapidly in the market.</p>
