Brief Introduction of the Organization	Brief Introduction of the Organization Jiangsu Burgeree New Technology Materials Co., Ltd is a individually-run technological enterprise. It focus on the R&D, production and sales of PET acoustic materials. The main products are environment friendly, sound absorption and recyclable polyester fiber products. With enormous assets and abundant technology, it has two production bases, a R&D center, an enterprise technology center,and has established distributors across the country.		
Name of the Project	Design and development of environmental recyclable polyester fiber acoustic products		
Industry	new material		
Introduction of the Project	Burgeree is responsible for new products development, sample preparation, volume production, advertisement and sales in this project. Designer is responsible for the market research before the development of new products and new products design and modification. The products of this project are harmless, free of formaldehyde, recyclable, sound-absorbing and fire retardant. These products can replace wood and improve interior sound environment in office furniture areas. They can be used in theatre, audition room, cinema and other places where good sound environment is needed to substitute traditional glass fiber and rock wool. They can be used in kindergarten, house and other places where high environmental performance is required. The products of this project are modern, fashionable and easy-to-install and thus have vast market prospect.		
Cooperation Conditions	Face-to-face
